PROFILE

Recent M.Sc. graduate in **Autonomous Networks & Systems** (Université Paris Cité), specializing in **full-stack software development**. Proficient in **Python, PHP, Java, C++**, and **JavaScript** with hands-on experience building **REST APIs**, integrating **relational databases**, and automating workflows with **Bash and CI/CD** pipelines. Delivered a real-time industrial **web monitoring tool at SFR** (PHP, MySQL, SNMP) and automated **IT operations** for a fleet of **50+ vessels** at **CMA CGM**. Seeking a permanent position (**CDI**) in **software development, DevOps, or application engineering**.

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer - Final Year Intern (PFE) Feb 2026 – Aug 2026 · Paris · On-site
SFR

- Designed and built a real-time **SNMP-based web monitoring tool (PHP, MySQL, HTML/CSS/JS)** for electrical measurement units deployed across **SFR's technical network sites**.
- Integrated a **power consumption / temperature correlation** feature to support energy management decisions.
- Achieved a **50% reduction in time-to-metric** and improved incident anticipation for network operations teams.
- Built automated **Grafana dashboards** aggregating **multi-source KPIs** (electrical measurements, temperatures, alerts).
- Stack: **Linux · PHP · Python · MySQL · HTML/CSS/JS · SNMP v1/v2/v3 · Grafana**

PMO & Support Officer - New Build Vessels (Intern) Apr 2024 – Sep 2024 · Marseille · On-site
CMA CGM

- Automated **network monitoring and maintenance scripts in Python and Bash**, reducing incident resolution time.
- Supervised and coordinated IT infrastructure for **50+ vessels**: connectivity, servers, end-user systems.
- Configured and maintained onboard network equipment (**switches, routers, VLANs, VPN**).
- Managed **IT installation** projects for newly built vessels, ensuring on-time delivery.

TECHNICAL SKILLS

Languages: Python (Flask, FastAPI, Pandas) · PHP · Java · C/C++ · JavaScript · HTML/CSS · SQL · Bash
Development: REST APIs · OOP / Design Patterns · Full-Stack Web · Unit Testing · Error Handling · Technical Documentation
Databases & Data: MySQL · SQLite · Relational Modeling · PowerBI · PowerQuery · Pandas
DevOps & Tools: Git/GitHub · Docker · CI/CD (GitHub Actions) · Linux · VS Code · PyCharm · Postman · VirtualBox
Protocols: SNMP v1/v2/v3 · TCP/IP · HTTP/REST · JSON
Methodologies: Agile · Version Control · Continuous Integration · Code Review · Unit & Integration Testing

EDUCATION

M.Sc. Autonomous Networks & Systems (RSA) — Université Paris Cité 2024 – 2026 · Paris, France
Focus: Edge Computing · IoT · 5G · VANET · Cybersecurity · Software Engineering & Development
B.Sc. Computer Science — Aix-Marseille University 2023 – 2024 · Marseille, France
Algorithms · C/Unix Programming · Logic / Computability · Relational Databases
B.Sc. Computer Engineering & Networks — EMSI Marrakech 2020 – 2023 · Marrakech, Morocco
Licence Ingénierie Informatique et Réseaux

CERTIFICATIONS

C++ (SoloLearn) · **Python for Everybody**, University of Michigan (Coursera) · **Ubuntu Linux Professional Certificate**, Canonical · **Data Science** (SoloLearn) · **UML**, The Hong Kong University (Coursera) · **PHP** (SoloLearn)

PROJECTS

SFTIV - Secure File Transfer & Integrity Verification (Python · Cryptography) 2025

- End-to-end secure file transfer tool demonstrating the 3 pillars of security: confidentiality, integrity, authenticity.
- AES-256-GCM encryption, SHA-256 manifests, Ed25519 digital signatures, lightweight TCP client/server architecture.
- GitHub: github.com/larbi01/sftiv

LANGUAGES

English: Fluent · **French:** Native · **Arabic:** Native · **Spanish:** Basic
